Many naturals and 1 human triggered slide

Activity
Snowmobiling

We saw 6 natural avalanches on our ride in Lionhead. They all involved snow in the last week or two. On our exit we ran into who a group that witnessed a sledder triggering this slope. It was about 3 feet deep and was clearly wind loaded. Luckily he was not caught. When folks are triggering slides we know other slopes are also unstable. Be careful out there!

Region
Lionhead Range
Location (from list)
Airplane Bowl
Observer Name
Doug Chabot
