

Cracking on wind slabs in Beehive

Beehive Basin

Northern Madison

2/7/2019

Code

Latitude

45.32670

Longitude

-111.38700

Notes

Skiers got 4-6" wind pockets to propagate in the trees at lower elevations in Beehive Basin. Wind slabs were thicker in more exposed areas and likely more reactive at higher elevations.

Number of slides

1

Number caught

0
