Wind Slab avalanche on Mt. Blackmore

Mt Blackmore Northern Gallatin 11/10/2019 Code Latitude 45.44440 Longitude -111.00400 Notes

Natural wind slab avalanche on the N face of Mount Blackmore on 11/10/2019.

From email: "Noted recent activity on the N face which likely happened yesterday during the storm; upper half of the avalanche and crown had been scoured by wind, but the toe of the debris was still visible and had traveled quite far"
