

Cornice triggered avalanche in Divide Basin, Hyalite

Divide Cirque
Northern Gallatin
1/4/2021
Code
C-NC-R2-D2
Elevation
9600
Aspect
E
Latitude
45.39340
Longitude
-110.96900
Notes

A backcountry skier wrote, "...observed a fairly large, [cornice](#)-triggered avalanche on an east [aspect](#) at 9600' that looked to be several hours old. The crown was 40-100 cm deep, and it looked like it failed about 20 cm into the facets that make up the lower half of the snowpack in this region."
