

Natural avalanche hit Daisy Pass road

Date

Sat, 02/25/2023 - 09:30

Activity

Snowmobiling

A snowmobiler saw this natural avalanche hit the Daisy Pass road within 10 minutes of riding by. He did a beacon search on the debris to confirm no one had been caught. It occurred about noon. This path is not very visible from the bottom and is not one that runs regularly. [It killed a rider who was on the road in February 2012.](#) The accident report has good photos of the path from afar.

Wind-[loading](#) in the start zone was the likely [trigger](#) since skiers and sledgers do not access it.

From an email: "The crown was hard to see, but only looked a few feet deep where I could see it, but the debris pile was 10'+ on the road."

A big thanks to Dan Wykoff and Ben Zavora for providing the story and pictures.

Region

Cooke City

Location (from list)

Daisy Pass
