

Avalanche activity Goose Lake

Date

Fri, 03/17/2023 - 16:00

Activity

Skiing

A few recent slides were visible today on south, east and west aspect around goose lake zone. Looked like mostly wind slabs in the new snow. Pit on East aspect was deeper than three meter probe. Showed relatively right side up pack in the first meter. ECTN 23 about 20 CM down. No other signs of instability observed.

Region

Cooke City

Location (from list)

Goose Lake
