

Natural full depth wet slides in closed terrain at Big Sky

Big Sky Resort
Northern Madison
4/11/2023
Code
WL-N-R2-D2-O
Elevation
10000
Aspect
S
Latitude
45.27600
Longitude
-111.43600
Notes

From Big Sky Ski Patrol: "Temps remained a little cooler than yesterday and generally topped out in the mid 40's F. That didn't stop the free water from moving and continuing to destabilize the snowpack, primarily on solar aspects below 10,000'. Near full depth to full depth wet loose avalanches continued to naturally release in what was left of the A-Z's as well as LRT which had not seen any activity yesterday."

Number of slides
5
Number caught
0
Number buried
0
Avalanche Type
Wet loose-snow avalanche
Trigger
Natural trigger
R size
2
D size
2
Bed Surface
O - Old snow
Problem Type
Wet Snow
