## **Beehive basin**

Date Tue, 11/19/2024 - 03:35 Activity Skiing

Two obvious layers. sun crust layer with a foot of wind blown on top. top layer failed while isolating column for pit test. photos are from a video that i cannot attach. it just shows the two layers. i tried to preform the test to the left but it failed prior to any taps.

Region Northern Gallatin Location (from list) Beehive Basin Observer Name Daniel McClung
