

Storm Slab Avalanche on Mt Blackmore

Mt Blackmore
Northern Gallatin
1/11/2025
Code
SS-N-R2-D2
Elevation
8700
Aspect
N
Latitude
45.44680
Longitude
-110.98900
Notes

From obs: "Probably already reported...but touchy storm slabs on Mt Blackmore. Attached is a photo of a natural from the approach, at the switchbacks to the upper basin."

From obs: Saw a fairly large (could bury a person) [slide](#) while heading up to ski on mt Blackmore. It was on a north [aspect](#) at around 8700 ft. It seemed to have failed in the recent storm snow, some wind may have made the [slab](#) a little thicker. The debris covered a portion of yesterday's ski [track](#). Higher in the bowl we found unstable snow around ridge lines, with several small loose sluffs coming down."

Number of slides
1
Number caught
0
Number buried
0
Avalanche Type
Soft slab avalanche
Trigger
Natural trigger
